

Update Zoom on Your Device

Zoom regularly releases updates. OLLI recommends checking at least once a month.

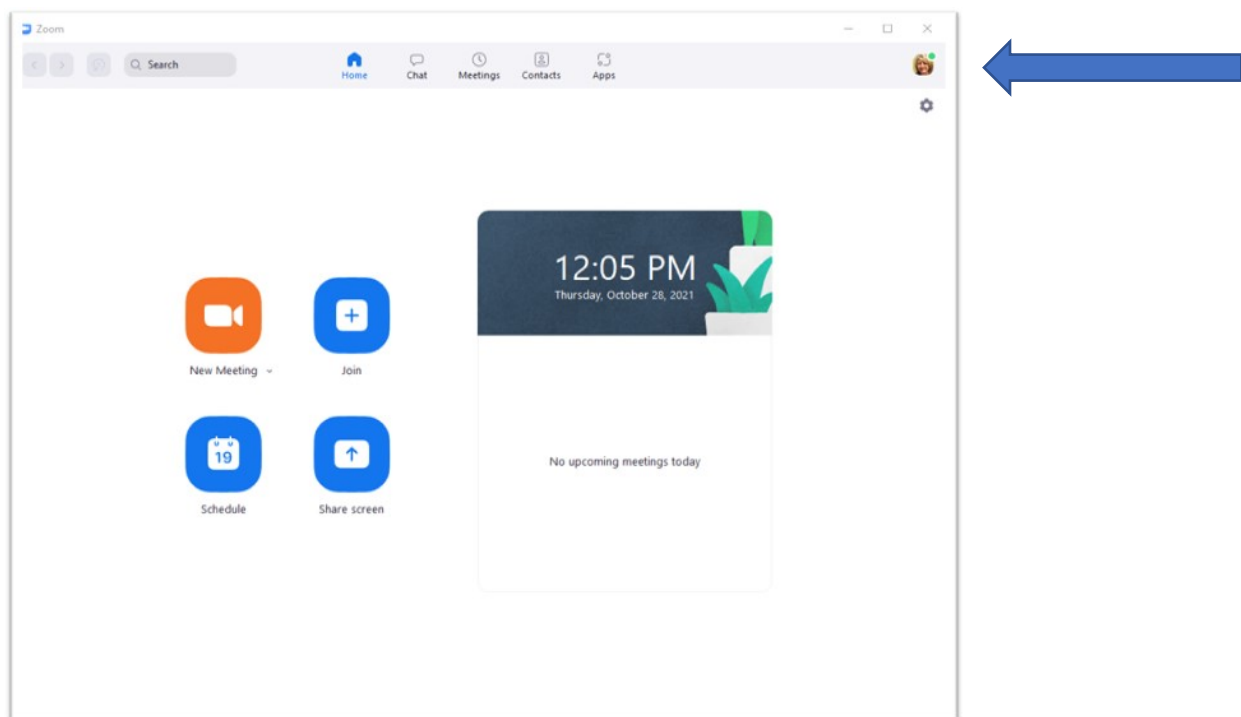

Here's how:

Click on zoom icon on your device

Sign in if you are not already signed in.

Click on initials/name/photo in top right corner

That will bring up a menu.

Look down the list and find, then click on **CHECK FOR UPDATES**

If already updated a message like this will show:

Otherwise zoom will run a check and then show a notice that says **updates available** and gives the option to update. It should not take long to do this.
